LVTmoto opens new logistics terminal in Caldes de Montbui near Barcelona

++ Area tripled to 16,000 sqm ++ BREEAM certification ++ Shortened delivery times and availability of two-wheelers ++ Logistics hub located between the Mediterranean region and Central Europe ++ Operation scheduled to start in the first quarter of 2026 ++

Salzburg, Caldes de Montbui, February 11, 2026. Spanish two-wheeler logistics provider LVTmoto (Logistic Vázquez Tarrés S.L.), a Lagermax Group company, is relocating its operations from its previous location in Santa Perpetua de Mogoda to the newly built logistics terminal in Caldes de Montbui, near Barcelona. This strategic move marks an important milestone in the company's further development and underlines LVTmoto's clear commitment to operational excellence in the Iberian Peninsula and the Balearic Islands.

The modern logistics center impresses with optimized processes, state-of-the-art infrastructure, and is strategically geared towards future growth. Its location in the La Borda industrial park, on the second ring road of Barcelona, offers a decisive logistical advantage: the direct connection to one of the most important transport axes along the Spanish Mediterranean coast, which is also an integral part of the European transport network, ensures excellent transnational accessibility.

Responsible logistics – BREEAM certification for logistics terminal

Environmental awareness meets efficiency – in Caldes de Montbui, expanded capacities for optimized storage and distribution of motorcycles and scooters are available on an area of over 16,000 m². The modern facility has 15 docking gates, 120 parking spaces and energy-efficient LED lighting. Built to the latest ecological standards, the building has been awarded BREEAM certification with a rating of “Very Good.”

"With the newly constructed logistics platform, which triples the existing space and optimizes operational processes, we are creating the best conditions for our long-standing partners and new customers for even faster delivery times and higher availability of their two-wheelers. Operations are scheduled to start in the first quarter of 2026," says Eva Vasquez.

Environmentally friendly two-wheeler distribution at the point

Specializing in distribution and storage, LVTmoto has been offering packaging-free transport for many years as an environmentally friendly solution for the distribution of two-wheelers for businesses and private individuals.

Due to its strategically favorable location in the immediate vicinity of Barcelona, Caldes de Montbui serves as an ideal hub and logistics center between the Mediterranean region and Central Europe. This strengthens LVTmoto's international competitiveness and positions it for further growth in the long term.

About the Lagermax Group

Under the motto "Together in motion." the Lagermax Group offers a sophisticated distribution network for all customer requirements with over 85 of its own locations in 15 European countries. Borders are blurring, local characteristics remain – Lagermax turns both into its strengths. The Lagermax Group generated total sales of €765 million in 2024 and employs 4,100 people.
